Growth Mindset Short Lecture Synopsis

**What was your result from the mindset quiz?**

I scored a mid 40s on the mindset quiz. Meaning that I have a growth mindset but I question it's applicability when interacting with other people.

**Do you have a different perspective now?**

Not necessarily. I know I am in control of my own destiny. It's contributing to the growth of other's that I question and I haven't seen the principle apply in every scenario in my own life.

**How do you think it will effect your outlook moving forward?**

I suspect I'll be on the lookout for where I can bring more of a growth mindset into my own life. Overall I think that it's something that I do already but I think that I can always improve.
